PROFILE

Software Engineer in final year of engineering studies, specializing in Full Stack development. Expert in designing complete, scalable web applications, proficient in React.js, Angular, TypeScript, PHP, Python, Java/Spring Boot and database management (Oracle, MySQL, Firebase). Proven experience in microservices architecture and REST API integration. Capable of delivering robust solutions from architectural design to production in agile environments.

SKILLS

Technical skills :

- **Backend** : PHP(Symfony/Laravel), Python(Django), Java(Spring Boot).
- **Frontend**: React.js, Angular, Typescript, HTML/CSS, Bootstrap, Tailwind CSS.
- **Databases**: MySQL, Oracle Database, SQL, Firebase.
- **Tools & Methodologies**: Docker, Git, Jira, Postman, SCRUM.

Soft Skills :

- Team collaboration and teamwork
- Quick learning ability and autonomy
- Problem-solving and technical architecture

Languages:

- Arabic – Native
- French – Fluent
- English – Fluent

CERTIFICATIONS

CISCO, 2025

Introduction to Data Science

SUPMTI, 2024

Active participation in Soft Skills workshop

MICROSOFT, 2020

Microsoft Office Expert Certification (Excel 2016, Word 2016)

EDUCATION

SUPMTI, Oujda, 2024 – 2026

Engineering Cycle – Software engineering

SUPMTI, Oujda, 2023 - 2024

Bachelor's Degree - Software Engineering, with Honors

Centre Mixte - OFPPT, Oujda, 2021- 2023

Specialized Technician Diploma - Full Stack Web Digital Development

University MOHAMMED PREMIER, Oujda, 2019 - 2020

Bachelor's Degree - English Studies - Linguistics Option

Zaitoun Highschool, El Aioun, 2016 - 2017

Baccalaureate Degree - Physics

PROFESSIONAL EXPERIENCE

Technical Writer – Freelance – Alphorm | 2024

- Created technical documentation for online training courses
- Collaborated with technical and educational teams to ensure clarity and accuracy

Frontend Developer – Summer Internship – FCPO | 2024

- Designed and developed a complete e-commerce user interface in React.js & TypeScript
- Integrated REST APIs in collaboration with the Symfony backend team
- Teamwork and respect of best development practices

Full Stack Developer – Final-year Internship – SANLAM | 2023

- Developed a complete management platform: RESTful architecture, responsive UI in React.js, robust backend in Laravel
- Designed and optimized MySQL Database
- Comprehensive testing of API endpoints with Postman, implemented data validation and security measures

ACADEMIC PROJECTS

MicroProject –Microservices Architecture | 2025

- Design and development of a modular, service-oriented application
- Implementation of an API Gateway and inter-service communication

Technologies : Spring Boot, React + Vite, PostgreSQL, Docker

Mugs Atelier – E-commerce Platform | 2024

- Full-Stack development of an e-commerce platform, including order management and processing features.

Technologies : React.js, Django, MySQL, Tailwind CSS, Jira

BuildFolio – Web Application | 2024

- Designed and developed a web application allowing users to create and customize their portfolios.

Technologies: SpringBoot, React.js, MySQL, Bootstrap, Tailwind CSS
